

Hurricane Preparedness Resources and Information Sources

Indigo Run residents are encouraged to take advantage of the many reliable resources available to help prepare for hurricane season and stay informed before, during, and after a storm. These include the CrowderGulf Emergency Preparedness presentation video, the Town of Hilton Head's website and official Guide to Emergency Preparedness, and the 2026 South Carolina Hurricane Guide.

Residents can also stay connected through the Town's social media channels on Facebook, YouTube, and Flickr, as well as through Hilton Head Island Fire Rescue Emergency Management updates.

Helpful mobile apps such as MyHHI and the South Carolina Emergency Management Division app provide real-time alerts and important information. Additional trusted sources include the National Hurricane Center (NHC), NOAA, the National Weather Service, and local television stations (WSAV, WTOG, and WJCL).

For Beaufort County updates, residents can access the Sheriff's Office, storm center website, hurricane hotline, GIS flood mapping tools, and emergency management contacts. By utilizing these resources, residents can stay informed, prepared, and better equipped to respond to any hurricane-related impacts.
